<sup>1</sup> The Other Financial Corporations Survey (OFCS) is derived from the sectoral balance sheets of Other Financial Corporations, which comprise Global Business Corporations (GBCs), insurance corporations, pension funds, investment funds and financial auxiliaries.<sup>2</sup> Following IMF recommendation received in March 2024, credit to private sector has been separately identified.

Credit comprises of loans, debt securities and trade credit and advances; Private Sector encompasses private non-financial corporations (excluding authorised companies), households and non-profit institutions serving households.

<sup>3</sup> GBCs' nonresident equity liability positions have been treated as foreign (external) liabilities, in line with IMF recommendations.<sup>^</sup> Revised      <sup>\*</sup> Provisional

<sup>1</sup> Financial Corporations Survey (FCS) covers the accounts of all institutions included in the financial corporations sector, i.e. depository corporations and other financial corporations.<sup>2</sup> Following IMF recommendation received in March 2024, credit to private sector has been separately identified.

Credit comprises of loans, debt securities and trade credit and advances; Private Sector encompasses private non-financial corporations (excluding authorised companies), households and non-profit institutions serving households.

<sup>\*</sup> GBCs' nonresident equity liability positions have been treated as foreign (external) liabilities, in line with IMF recommendations.<sup>^</sup> Revised                      <sup>^</sup> Provisional

Notes:

(i) The Mauritius Exchange Rate Index (MERI), which is a weighted average of bilateral exchange rates for the Mauritian rupee, is a summary measure of the rupee's movements against the currencies of its important trading partners.

(ii) The choice of currencies has been influenced by the importance of the currency distribution of trade flows of Mauritius with the rest of the world.

(iii) Two indices have been derived: MERI1 and MERI2. MERI1 is based on the currency distribution of merchandise trade, while MERI2 is based on the currency distribution of merchandise trade and tourism earnings.

(iv) The base year of the MERI is January - December 2007 = 100.

(v) An increase (decrease) in the index indicates a depreciation (appreciation) of the rupee.
